

# Sangoma Handsets Default login

164 Jonathan Thu, Oct 5, 2017 [How to and FAQs](#) 9505

The default login details for a default Sangoma handset is;

Username: admin

Password: admin

This should be the default password for handsets out of the box or after a factory reset, please note that these handsets support zero touch and if purchased via us they will most likely upon first boot or reset just connect directly to your PBX and the password will change to your PBX systems password. This will be the password you have specified for handset admin and user access see steps below;

The screenshot shows the Sangoma Admin interface with a navigation menu. The 'Endpoint Manager' option is highlighted with a red circle. Below the main menu, there is a detailed view of the 'Endpoint Manager' module, including an 'About Endpoint Manager' section and a sub-menu where 'Global Settings' is also circled in red.

Admin	Applications	Follow Me	Reports	Settings
Administrators	Announcements	IVR	Asterisk Info	Advanced Settings
Asterisk CLI		Languages	Asterisk Logfiles	Asterisk IAX Settings
Asterisk Modules		Misc Applications		Asterisk Logfile Settings
<u>Backup &amp; Restore</u>		Misc Destinations		Asterisk Manager Users
Blacklist		Paging and Intercom		Asterisk REST Interface Users
Bria Cloud Solutions		Park and Announce		Asterisk SIP Settings
Bulk Handler		Parking		CRM Settings
CID Superfecta		Queue Callback		<b>EndPoint Manager</b>
CallerID Lookup Sources		Queue Priorities		PBX Configuration
Certificate Management		Queues		

**Endpoint Manager**

**About Endpoint Manager**

This module is used to automatically provision & configure Desk Phones, Wireless Phones, Door Phones, Overhead Paging Devices, Gateways, and Specialty devices from supported manufacturers.

For information and instructions on using Endpoint Manager, please see the Endpoint Manager Wiki .

To get started please choose an option in the  Menu on the right.

- EndPoint**
- Global Settings**
- Extension Mapping
- Brands**

Then in the next screen add your desired passwords that your handsets will be set to;

## Endpoint Manager

### Global Settings

Internal Address ⓘ	<input type="text" value="██████████"/>
External Address ⓘ	<input type="text" value="pbxXXXXXXXXX.ic-talk.co.uk"/>
Ports ⓘ	<b>HTTP Provisioning Port</b> <input type="text" value="██████"/> Firewall Zone(s): Internal, Other
	<b>Secure HTTPS Provisioning Port</b> <input type="text" value="██████"/> Firewall Zone(s): Internal, Other
	<b>RESTfull Apps Port</b> <input type="text" value="██████"/> Firewall Zone(s): Internal
	<b>Secure RESTfull Apps Port</b> <input type="text" value="██████"/> Firewall Zone(s): Internal

Authentication of HTTP or HTTPS provisioning requests from endpoints is currently **enabled**. Configuration of provisioning ports and credentials is done through Sysadmin Provisioning Management .

The username that is currently configured for HTTP and HTTPS provisioning is '██████████' and the password is '██████████' (without quotes).
