

Sangoma Handsets Default login

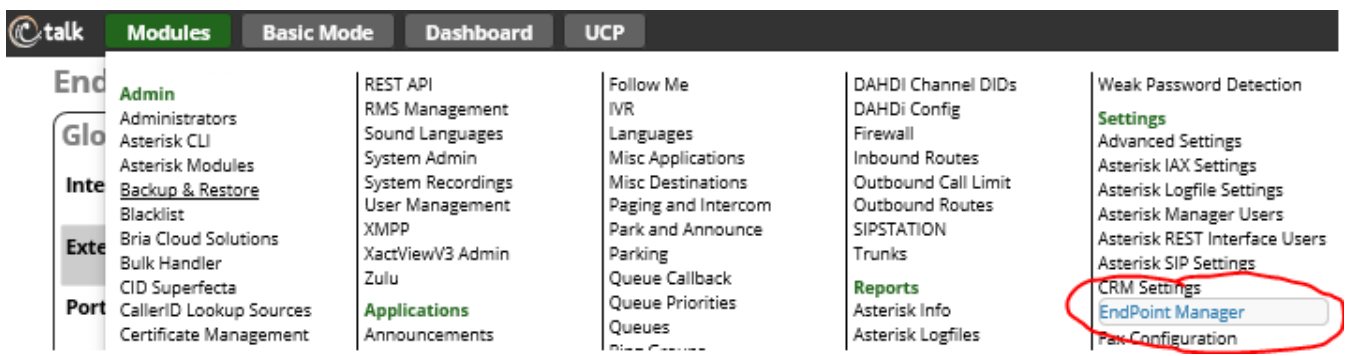

164 Jonathan Thu, Oct 5, 2017 [How to and FAQs](#) 8668

The default login details for a default Sangoma handset is;

Username: admin

Password: admin

This should be the default password for handsets out of the box or after a factory reset, please note that these handsets support zero touch and if purchased via us they will most likely upon first boot or reset just connect directly to your PBX and the password will change to your PBX systems password. This will be the password you have specified for handset admin and user access see steps below;

The screenshot shows the Sangoma management interface with a navigation menu. The 'Endpoint Manager' option is highlighted with a red circle. Below this, another screenshot shows the 'Endpoint Manager' page with the 'Global Settings' option also circled in red.

Admin	Applications	Follow Me	Reports	Settings
Administrators	Announcements	IVR	Asterisk Info	Advanced Settings
Asterisk CLI		Languages	Asterisk Logfiles	Asterisk IAX Settings
Asterisk Modules		Misc Applications		Asterisk Logfile Settings
<u>Backup & Restore</u>		Misc Destinations		Asterisk Manager Users
Blacklist		Paging and Intercom		Asterisk REST Interface Users
Bria Cloud Solutions		Park and Announce		Asterisk SIP Settings
Bulk Handler		Parking		CRM Settings
CID Superfecta		Queue Callback		<u>EndPoint Manager</u>
CallerID Lookup Sources		Queue Priorities		Pan Configuration
Certificate Management		Queues		

About Endpoint Manager
This module is used to automatically provision & configure Desk Phones, Wireless Phones, Door Phones, Overhead Paging Devices, Gateways, and Specialty devices from supported manufacturers.
For information and instructions on using Endpoint Manager, please see the Endpoint Manager Wiki .
To get started please choose an option in the  Menu on the right.

- EndPoint
 - Global Settings
 - Extension Mapping
- Brands

Then in the next screen add your desired passwords that your handsets will be set to;

Endpoint Manager

Global Settings

Internal Address ⓘ	<input type="text" value="██████████"/>
External Address ⓘ	<input type="text" value="pbxXXXXXXXXX.ic-talk.co.uk"/>
