Fortigate DC Replication RPC port 135 Session-Helper

188 Les Carr Wed, Dec 6, 2017 Fortigate UTM 4753

Symptom:

DC replication fails between disparate networks.

The Fortigate session helper tries to intercept and control this service

Solution:

con sys session-helper

show

Look for these other two entries

edit 17
set name dcerpc
set protocol 6
set port 135
