

Fortigate DC Replication RPC port 135 Session-Helper

188 Les Carr Wed, Dec 6, 2017 [Fortigate UTM](#) 4230

Symptom:

DC replication fails between disparate networks.

The Fortigate session helper tries to intercept and control this service

Solution:

```
con sys session-helper
```

```
show
```

Look for these other two entries

```
edit 17
set name dcerpc
set protocol 6
set port 135
next
```

```
edit 18
set name dcerpc
set protocol 17
set port 135
```

```
delete 17
```

```
delete 18
```

```
end
```
