Fortigate DC Replication RPC port 135 Session-Helper

Symptom:

DC replication fails between disparate networks.

The Fortigate session helper tries to intercept and control this service

Solution:

con sys session-helper

show

Look for these other two entries

```
edit 17
 set name dcerpc
 set protocol 6
 set port 135
 next

 edit 18
 set name dcerpc
 set protocol 17
 set port 135
```

delete 17

delete 18

end
