

Draytek IC-air configuration

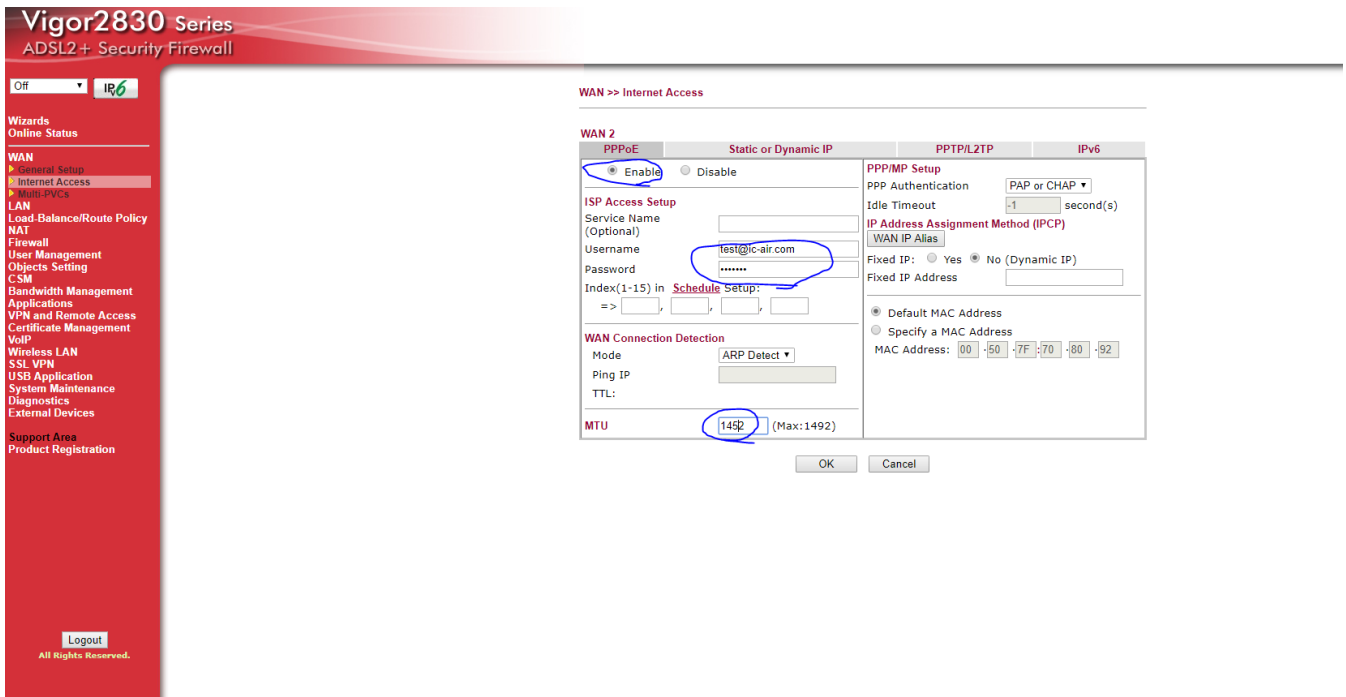

191 Keira Tait Mon, Dec 18, 2017 [Draytek Routers](#) 1635

Before you start to configure the router. Please see the Article "How to locate your configuration sheet". Once you have read and followed the steps in that article, you can proceed to configure your router.

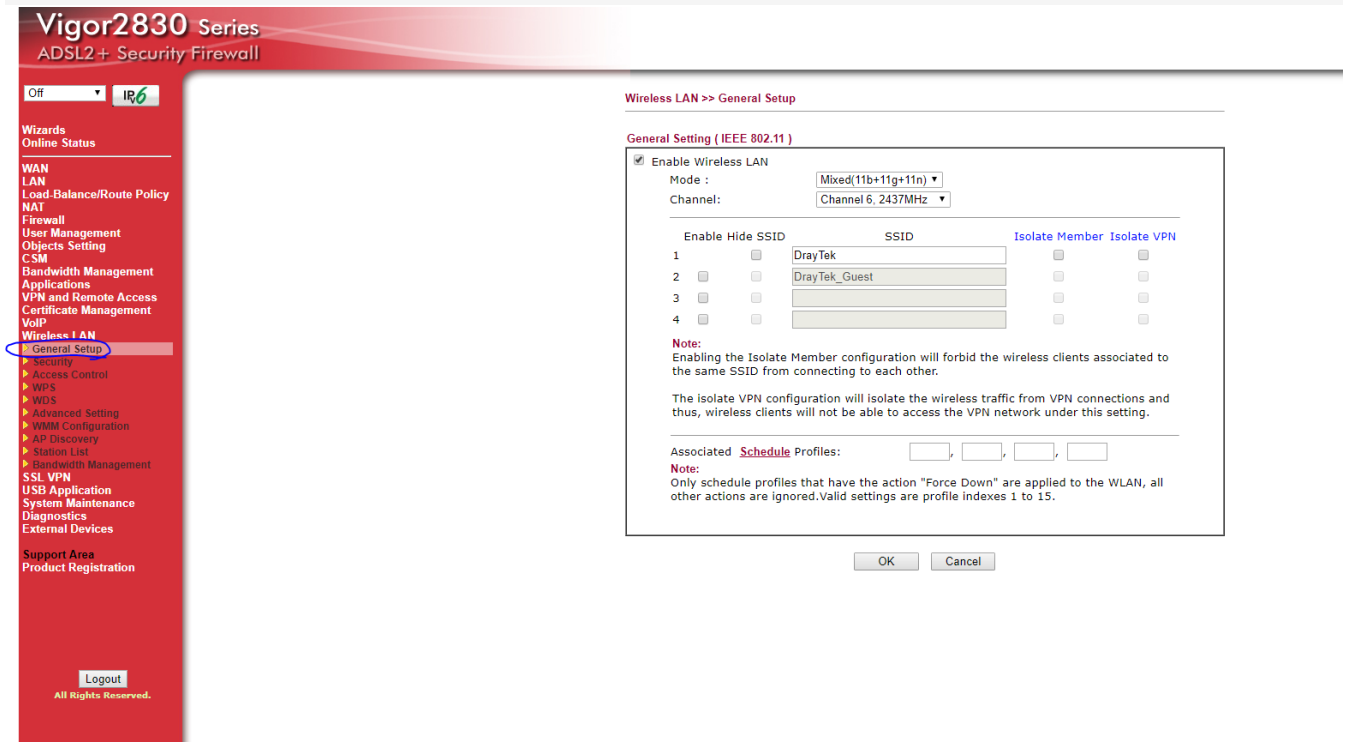

1. Log into the device via IP 192.168.1.1 using these details ;username = admin Password = admin
2. Once logged in, select Internet access in WAN, change the access mode to PPPOE and then select details page

The screenshot shows the Draytek ADSL2+ Security Firewall configuration interface. The left sidebar contains a navigation menu with categories like Wizards, WAN, LAN, Firewall, and Support Area. The 'WAN >> Internet Access' page is displayed, featuring a table with columns for Index, Display Name, Physical Mode, and Access Mode. The table lists three WAN ports: WAN1 (ADSL, PPPoE / PPPoA), WAN2 (Ethernet, PPPoE), and WAN3 (USB, 3G/4G USB Modem(PPP mode)). The 'Details Page' link for WAN2 is highlighted with a blue circle. Below the table, there is a note: 'Note : Only one WAN port can be configured to support IPv6.' and an 'Advanced' button with the text 'You can configure DHCP client options here.'

3. Once you're in details page, enable the connection, put in your own customer username and password (if you do not have these and cannot find them from the how to locate your configuration sheet, contact support).

Once this is completed, you should gain internet access, if you wish to configure your WIFI go to the below.

Within General setup you can change the SSID, and within security you can change the password for the WIFI.

You have now completed the steps to configuring your router.
