Draytek IC-air configuration

191 Keira Tait Mon, Dec 18, 2017 Draytek Routers 1707

Before you start to configure the router. Please see the Article "How to locate your configuration sheet". Once you have read and followed the steps in that article, you can proceed to configure your router.

- 1. Log into the device via IP 192.168.1.1 using these details ;Username = admin Password = admin
- 2. Once logged in, select Internet access in WAN, change the access mode to PPPOE and then select details page

3. Once you're in details page, enable the connection, put in your own customer username and password (if you do not have these and cannot find them from the how to locate your configuration sheet, contact support).

Once this is completed, you should gain internet access, if you wish to configure your WIFI go to the below.
