Version 10.13.66-22 - Approved

196 Mark Simcoe Tue, Feb 20, 2018 Upgrades / Announcements 1929

We have tested and confirmed acceptability of the firmware release below;

Current Approved Version: 10.13.66-22

This may be only one higher than initial launch but contains a 8 version higher set of updates for the Sangoma Handsets which we recommend is applied as it removes many initial release bugs and feature changes.

To upgrade please go into System Admin | Upgrades

The upgrade will take around 30 minutes but actual downtime will be minimal as final restart happens in under one minute.
