Office 365 Android setup

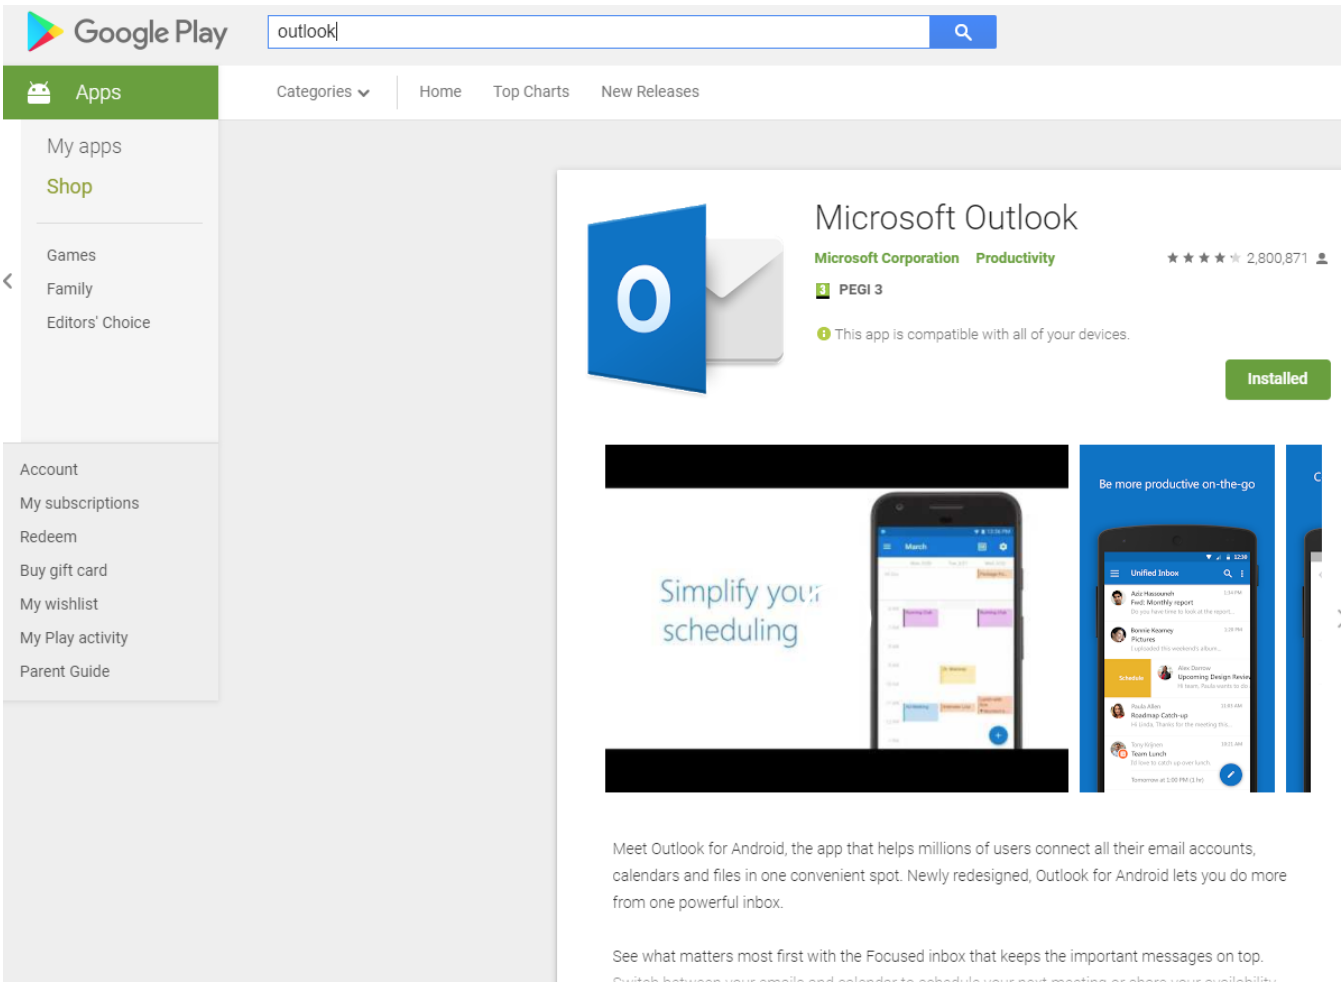

200 Keira Tait Fri, Apr 6, 2018 Office 365 2826

In order to setup your Android device for office 365, follow the steps below.

You will need to download Outlook from the Play Store, as most Android devices cannot do Exchange email with their inbuilt apps. Because of this we suggest downloading outlook as it is free.

Open your Play store app on your phone, and type in outlook
