OSPF routing cost - quick overview

The ospf routing cost is part of what the OSPF network uses to choose between alternative routes
the default value they use is rubbish because any

```
Router-ospf-10-auto-cost-reference-bandwidth 500000
```

Juniper configuration for OSPF

... do not have an auto option and the cost per interface is specified as a direct cost

The table of costs we will set are shown below

Bits/sec	Routing Cost
2M	
10M	
40M	80,000
