

Call Logging

325 Darren M Mon, Feb 15, 2021 [Site / Company Features](#) 798

Call Logging

Description

Call Logging is a set of call analysis features in the Business Portal that allow CPs, Company Administrators and Site/Group Administrators to view and analyse call logging information.

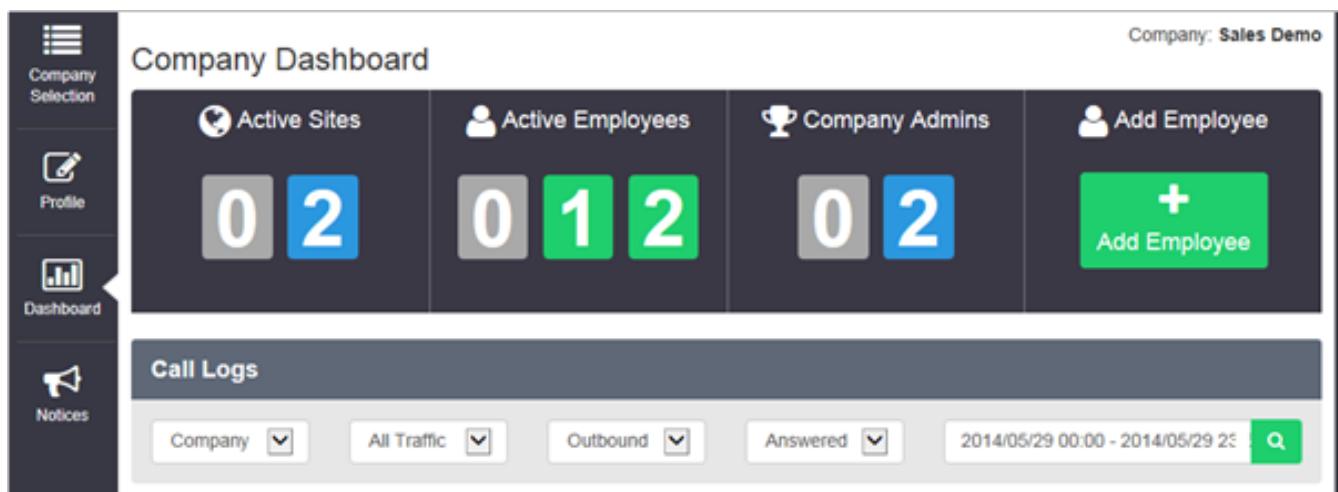

Accessing Call Logging

Call Logging is accessed in the Business Portal using the 'Dashboard' option. The Dashboard used will depend on the level of login, Company Administrator – 'Companies' Dashboard, End-User – 'Employees' Dashboard etc.

Company Administrator Access

Company Administrator access is for End Customer Administrators. This role allows access to an entire company, all of its Sites, Users and Features etc.

Both the CP Administrator and Company Administrator will access Call Logging via the Company Dashboard and have access to all Call Logging search criteria, data and features across the whole Customer.

The screenshot shows the Company Dashboard interface. On the left, a vertical sidebar menu includes 'Company Selection', 'Profile', 'Dashboard' (which is the active tab), and 'Notices'. The main content area is titled 'Company Dashboard' and shows 'Company: Sales Demo'. It features four summary cards: 'Active Sites' (0 2), 'Active Employees' (0 1 2), 'Company Admins' (0 2), and an 'Add Employee' button. Below this is a 'Call Logs' section with a search bar and filters for 'Company', 'All Traffic', 'Outbound', 'Answered', and a date range from '2014/05/29 00:00' to '2014/05/29 25'.

Site Administrator Access

Group Administrators that are configured to administer a customer's Site or Sites only have access to Call Logging for the Sites that they have been assigned Admin Privileges for.

Group Administrators (Employee Groups) Access

Employee Group Administrators can only access call logging via the individual Employee Dashboards that they have been assigned Admin Privileges for.

See Employee dashboard below

Employee Access

Employees can access their own Call Logging Data via the Dashboard option on the Business Portal Employee login.

Employee Dashboard

Voicemail	Missed Calls						
Unread	No calls to display						
Read							
Dialed Calls	Received Calls						
02036510331	29 Apr	15:01		0331	29 Apr	14:50	
02079930395	29 Apr	14:50					
0331	29 Apr	14:47					

Call Logs

User All Traffic Outbound Answered 2014/05/29 00:00 - 2014/05/29 23:59

Call Logging Features

Employee Dashboard

The dashboard includes the following sections:

- Voicemail:** Shows 0 Unread and 0 Read voicemail messages.
- Missed Calls:** Shows "No calls to display".
- Dialed Calls:** Shows three recent calls: 02036510331 (29 Apr, 15:01), 02079930395 (29 Apr, 14:50), and 0331 (29 Apr, 14:47).
- Received Calls:** Shows one recent call: 0331 (29 Apr, 14:50).
- Call Logs:** A search interface with dropdowns for User, All Traffic, Outbound, Answered, and a date range (2014/05/29 00:00 - 2014/05/29 23:59), and a search button.

Please see the Call Logs section of the appropriate portal user guide for each user type for further information on how to use the features and some example popular searches and analysis.

Please note that there is a maximum delay of approximately 15 minutes for new calls to be displayed in the Call Logging service.

A high level description of the features are as follows:

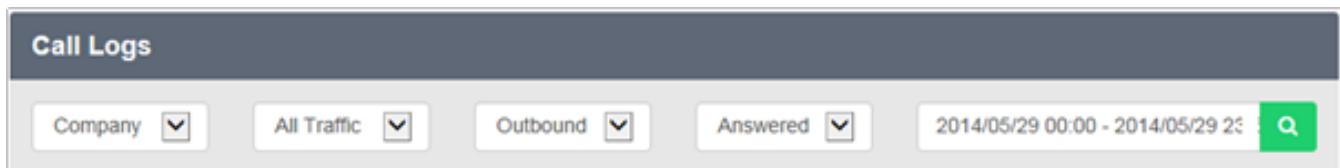

Flexible Access and Search

Company Administrators can access Call Logging for their entire communications estate and Group Administrators can access just the information that is relevant to them.

Contextual search criteria allow you to quickly focus on specific teams, numbers or types of call traffic or view information for the whole company.

- Open a web browser and login to the Business Portal using your Username, Domain and Password.
- The Web Page should open at the Dashboard page
- You will see the Call Logging search window below.

By default the search criteria is set to Company, all outbound and answered traffic:

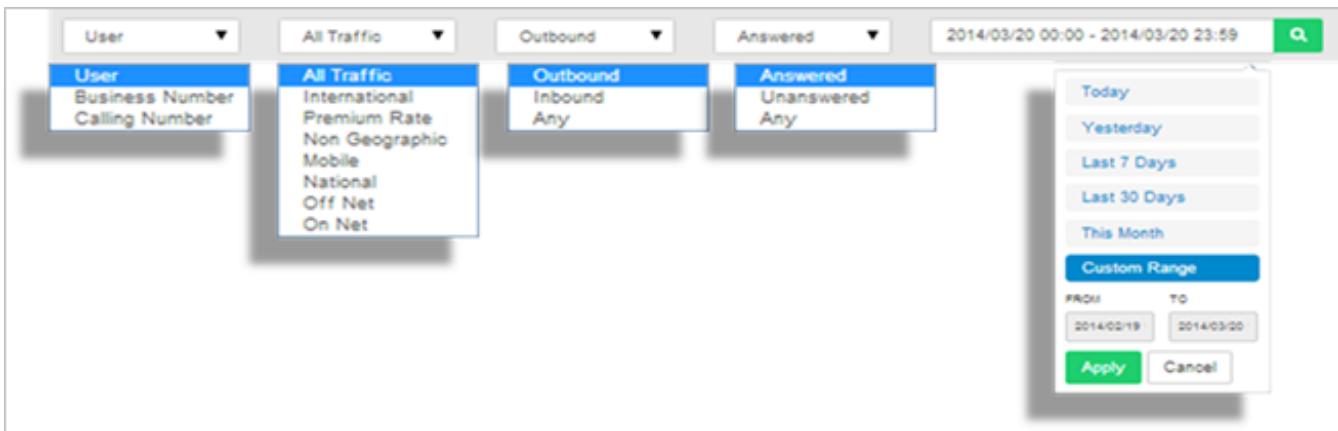

Build your search by selecting your criteria from the options boxes and then click the magnifying glass to submit the search and view the results.

The Graph and Compare Views, List View, Type View and Top 10 Views (detailed below) will display the results based on your chosen search. There is a maximum delay of approximately 15 minutes for new calls to be displayed.

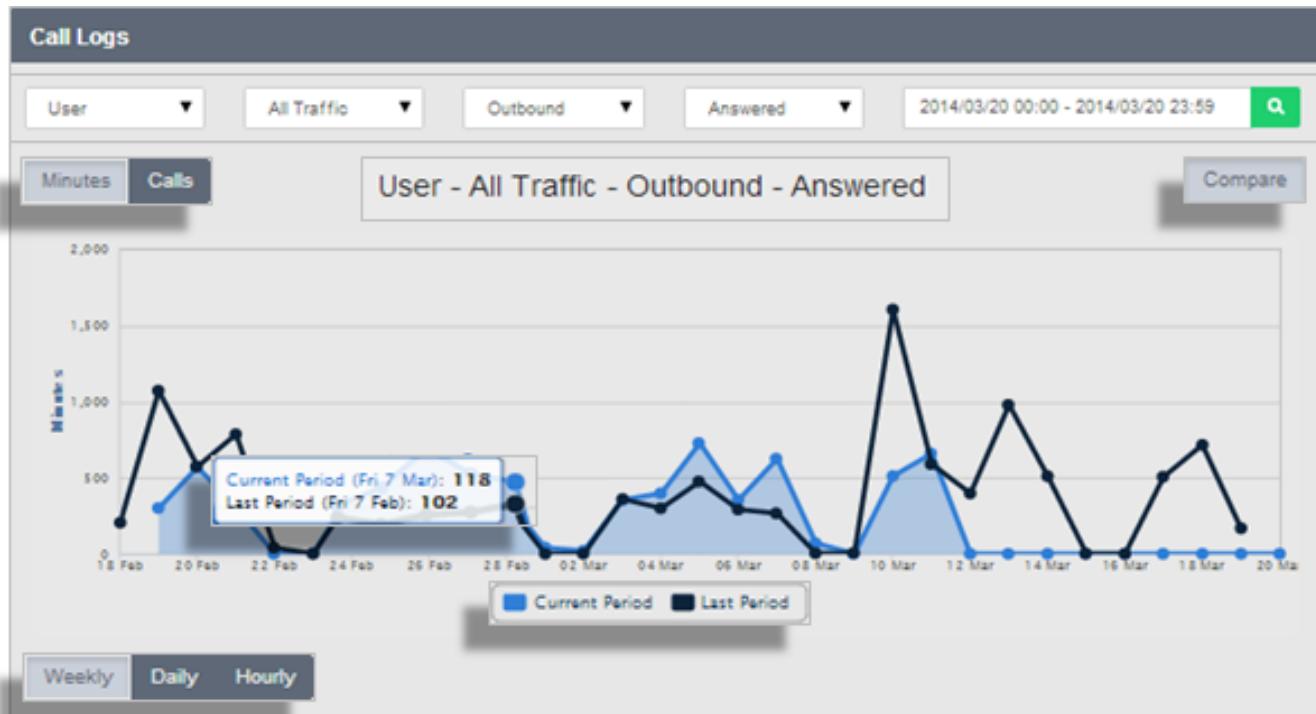

The search criteria available to are:

- Object:
 - Company, Site, User (by Username), Business Number (by full or partial telephone number), Calling Number (by full or partial telephone number)
- Traffic:
 - All Traffic, International, Premium Rate, Non-Geographic, Mobile, National, Off-Net, On-Net
- Direction:
 - Outbound, Inbound, Any
- Status:
 - Answered, Unanswered, Any

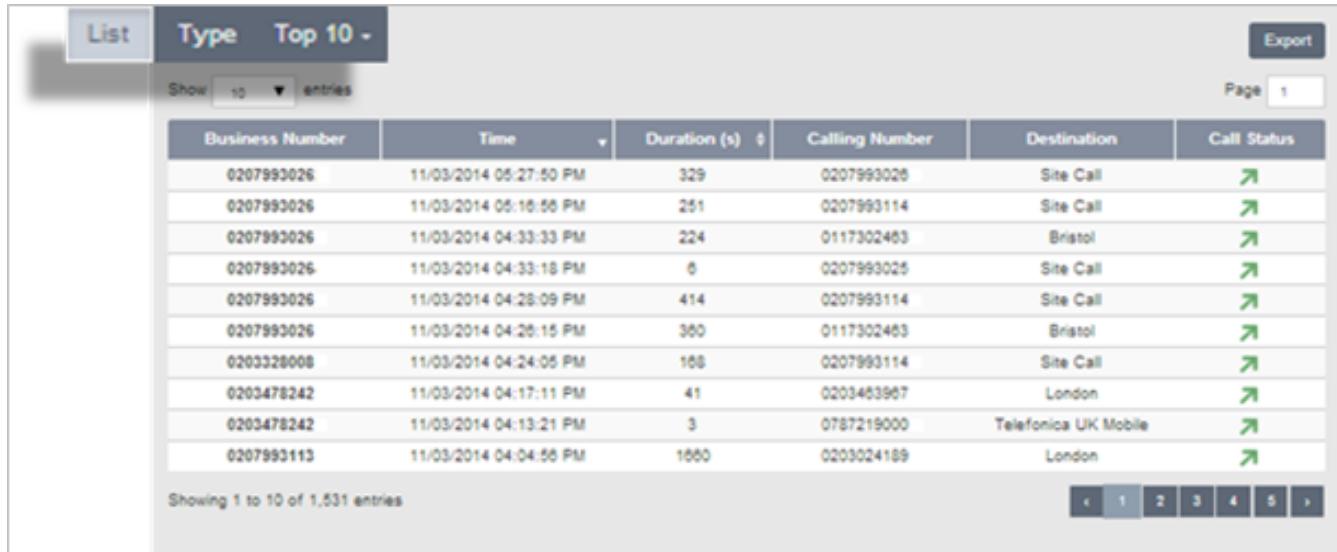

Graphical View and Compare

When your results are returned, the Graphical View displays total calls or minutes for the current monthly period by hour, day, week or month. You can zoom into the graph for monthly down to hourly views and pan across the graph to move to the previous or next period of time. You can hover over each data point dot on the graph to display the values.

- Zoom between Hourly, Daily, Weekly and Monthly data
- Use the interactive graph to pan and hover for more data
- A comparison feature overlays the previous period's data results, allowing you to analyse patterns and trends.
- You can switch between the views detailed below using the View Buttons:

List View

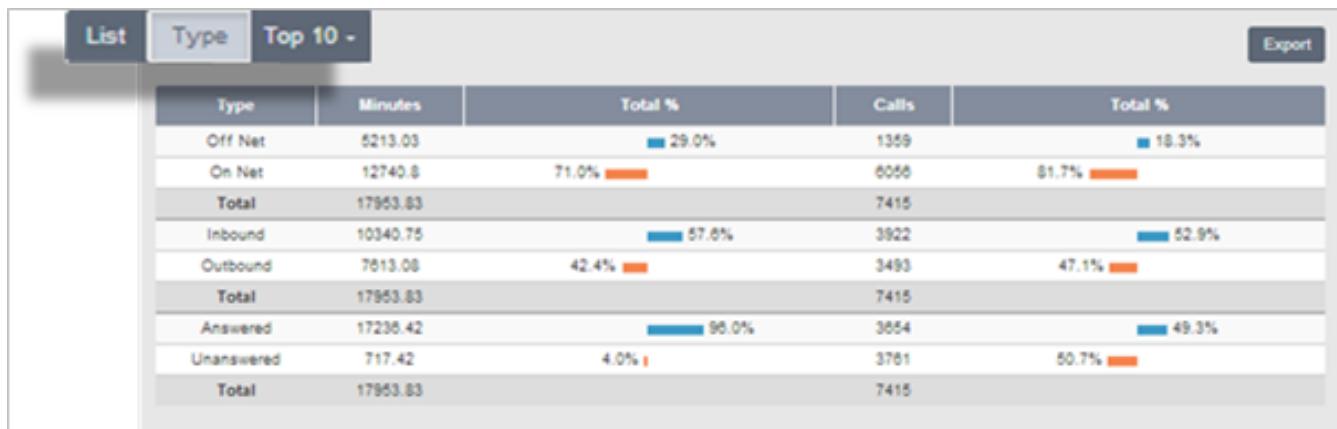

The screenshot shows a web-based application interface for a call log search. At the top, there are three tabs: 'List' (selected), 'Type', and 'Top 10 -'. Below the tabs is a search bar with the placeholder 'Search'. Underneath the search bar are buttons for 'Type', 'Top 10 -', and 'Export'. The main area is a table with the following columns: Business Number, Time, Duration (s), Calling Number, Destination, and Call Status. The table contains 10 rows of data. At the bottom of the table, it says 'Showing 1 to 10 of 1,531 entries' and has a page navigation bar with buttons for 1, 2, 3, 4, 5, and >.

Business Number	Time	Duration (s)	Calling Number	Destination	Call Status
0207993026	11/03/2014 05:27:50 PM	329	0207993026	Site Call	↗
0207993026	11/03/2014 05:16:56 PM	251	0207993114	Site Call	↗
0207993026	11/03/2014 04:33:33 PM	224	0117302463	Bristol	↗
0207993026	11/03/2014 04:33:18 PM	6	0207993025	Site Call	↗
0207993026	11/03/2014 04:28:09 PM	414	0207993114	Site Call	↗
0207993026	11/03/2014 04:26:15 PM	360	0117302463	Bristol	↗
0203328008	11/03/2014 04:24:05 PM	168	0207993114	Site Call	↗
0203478242	11/03/2014 04:17:11 PM	41	0203483967	London	↗
0203478242	11/03/2014 04:13:21 PM	3	0787219000	Telefonica UK Mobile	↗
0207993113	11/03/2014 04:04:56 PM	1660	0203024189	London	↗

The List View provides individual call information on the results of your search including the Business Number, Time, Duration, Calling Number, Destination and Call Status.

You can order the List View results by ascending or descending Time or Duration by clicking on the corresponding column title. Browse the data by selecting the number of entries to display and/or by navigating through the result pages.

Type View

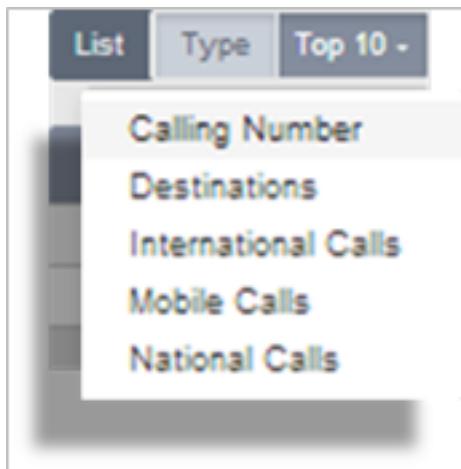

The screenshot shows a web-based application interface for a call type analysis. At the top, there are three tabs: 'List' (selected), 'Type', and 'Top 10 -'. Below the tabs is a search bar with the placeholder 'Search'. Underneath the tabs are buttons for 'Type', 'Top 10 -', and 'Export'. The main area is a table with the following columns: Type, Minutes, Total %, Calls, and Total %. The table contains 10 rows of data. Each row includes a blue progress bar indicating the percentage of total minutes or calls. At the bottom of the table, it says 'Showing 1 to 10 of 1,531 entries' and has a page navigation bar with buttons for 1, 2, 3, 4, 5, and >.

Type	Minutes	Total %	Calls	Total %
Off Net	5213.03	29.0%	1359	18.3%
On Net	12740.8	71.0%	6056	81.7%
Total	17953.83		7415	
Inbound	10340.75	57.6%	3922	52.9%
Outbound	7613.08	42.4%	3493	47.1%
Total	17953.83		7415	
Answered	17236.42	96.0%	3654	49.3%
Unanswered	717.42	4.0%	3761	50.7%
Total	17953.83		7415	

The Type View allows you to instantly compare different types of calls to provide key information including the amount of Off-Net calls versus On-Net calls, Inbound vs. Outbound and Answered vs. Unanswered. The Type View displays the percentage split of total minutes and total calls for each call type.

This is a useful feature to instantly view how many of your calls are On-Net (often within the Company or between Sites) versus Off-Net calls to people outside of your Company.

Top 10 View

The Top 10 View provides the 10 highest results based on your search and top 10 category selection. For example, this allows you to see the top 10 destinations or numbers involved in calls across your whole Company, individual users or Groups.

The top 10 view allows you to see what the most popular calls are being made and received.

Export Tool

The export tool allows you to export the current data in the chosen search and view to a CSV file. Click the Export button this will automatically download all of the data in the current view in comma-separated values format.
