

# Call Logging

## Call Logging

### Description

Call Logging is a set of call analysis features in the Business Portal that allow CPs, Company Administrators and Site/Group Administrators to view and analyse call logging information.

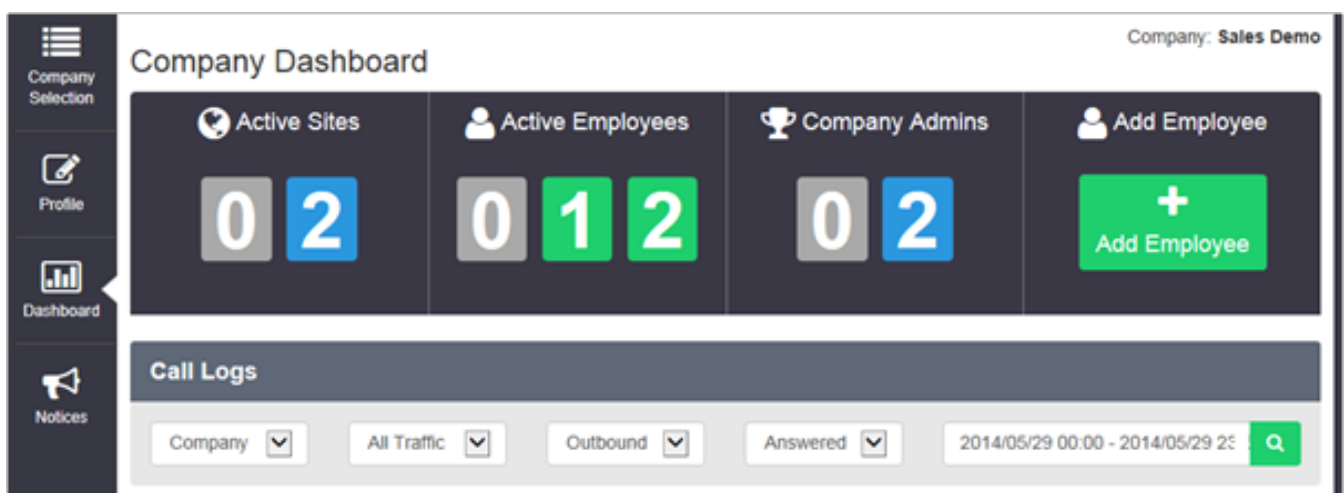

### Accessing Call Logging

Call Logging is accessed in the Business Portal using the 'Dashboard' option. The Dashboard used will depend on the level of login, Company Administrator – 'Companies' Dashboard, End-User – 'Employees' Dashboard etc.

### Company Administrator Access

Company Administrator access is for End Customer Administrators. This role allows access to an entire company, all of its Sites, Users and Features etc.

Both the CP Administrator and Company Administrator will access Call Logging via the Company Dashboard and have access to all Call Logging search criteria, data and features across the whole Customer.

## Site Administrator Access

Group Administrators that are configured to administer a customer's Site or Sites only have access to Call Logging for the Sites that they have been assigned Admin Privileges for.

The screenshot displays the 'Site Dashboard' for 'Demo Site'. It features four main sections: Active Employees, Auto Attendants, Call Centers, and Hunt Groups. At the bottom, there is a 'Call Logs' section with various filters and a search button.

## Group Administrators (Employee Groups) Access

Employee Group Administrators can only access call logging via the individual Employee Dashboards that they have been assigned Admin Privileges for.

See Employee dashboard below

## Employee Access

Employees can access their own Call Logging Data via the Dashboard option on the Business Portal Employee login.

The screenshot displays the 'Employee Dashboard' interface. It is divided into four main sections: Voicemail, Missed Calls, Dialed Calls, and Received Calls. At the bottom, there is a 'Call Logs' section with various filters and a search bar.

Please see the Call Logs section of the appropriate portal user guide for each user type for further information on how to use the features and some example popular searches and analysis.

Please note that there is a maximum delay of approximately 15 minutes for new calls to be displayed in the Call Logging service.

A high level description of the features are as follows:

### **Flexible Access and Search**

Company Administrators can access Call Logging for their entire communications estate and Group Administrators can access just the information that is relevant to them.

Contextual search criteria allow you to quickly focus on specific teams, numbers or types of call traffic or view information for the whole company.

- Open a web browser and login to the Business Portal using your Username, Domain and Password.
- The Web Page should open at the Dashboard page
- You will see the Call Logging search window below.

By default the search criteria is set to Company, all outbound and answered traffic:

Build your search by selecting your criteria from the options boxes and then click the magnifying glass to submit the search and view the results.

The Graph and Compare Views, List View, Type View and Top 10 Views (detailed below) will display the results based on your chosen search. There is a maximum delay of approximately 15 minutes for new calls to be displayed.

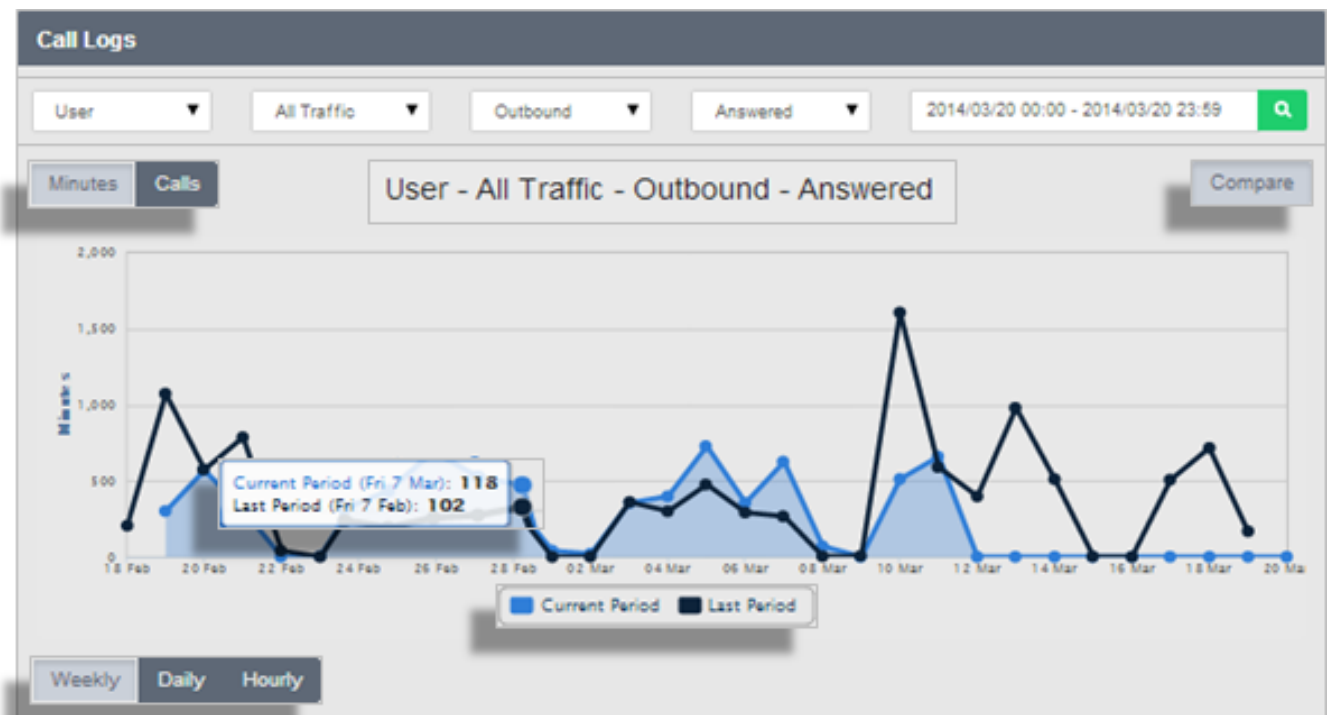

The search criteria available to are:

- Object:
  - Company, Site, User (by Username), Business Number (by full or partial telephone number), Calling Number (by full or partial telephone number)
- Traffic:
  - All Traffic, International, Premium Rate, Non-Geographic, Mobile, National, Off-Net, On-Net
- Direction:
  - Outbound, Inbound, Any
- Status:
  - Answered, Unanswered, Any

## Graphical View and Compare

When your results are returned, the Graphical View displays total calls or minutes for the current monthly period by hour, day, week or month. You can zoom into the graph for monthly down to hourly views and pan across the graph to move to the previous or next period of time. You can hover over each data point dot on the graph to display the values.

- Zoom between Hourly, Daily, Weekly and Monthly data
- Use the interactive graph to pan and hover for more data
- A comparison feature overlays the previous period's data results, allowing you to analyse patterns and trends.
- You can switch between the views detailed below using the View Buttons:

The List View provides individual call information on the results of your search including the Business Number, Time, Duration, Calling Number, Destination and Call Status.

You can order the List View results by ascending or descending Time or Duration by clicking on the corresponding column title. Browse the data by selecting the number of entries to display and/or by navigating through the result pages.

## Type View

Type	Minutes	Total %	Calls	Total %

Unanswered	717.42	4.0%	3761	50.7%
<b>Total</b>	<b>17953.83</b>		<b>7415</b>	

The Type View allows you to instantly compare different types of calls to provide key information including the amount of Off-Net calls versus On-Net calls, Inbound vs. Outbound and Answered vs. Unanswered. The Type View displays the percentage split of total minutes and total calls for each call type.

This is a useful feature to instantly view how many of your calls are On-Net (often within the Company or between Sites) versus Off-Net calls to people outside of your Company.

## Top 10 View

The Top 10 View provides the 10 highest results based on your search and top 10 category selection. For example, this allows you to see the top 10 destinations or numbers involved in calls across your whole Company, individual users or Groups.

The top 10 view allows you to see what the most popular calls are being made and received.

## Export Tool

The export tool allows you to export the current data in the chosen search and view to a CSV file. Click the Export button this will automatically download all of the data in the current view in comma-separated values format.
