

Internet Central DNS Server Settings

91 Jonathan Tue, Aug 1, 2017 [Broadband / IC-Air](#), [Ethernet / MPLS](#), [Hosting & Datacentres](#), [Security & Firewalls](#) 5742

What DNS server settings should I be using?

IC provides recursive or caching name servers for you to use.

You can use these from any IC supplied connection. (They are for IC customers only, not the world to use)

| Location | IPv4 Address | IPv6 Address |
|------------|-----------------|------------------|
| London | 193.188.204.100 | 2a02:ac00:1:1::3 |
| Manchester | 193.188.205.100 | 2a02:ac00:2:1::3 |

To manage you DNS domains see this article [How Do I Manage my Domains \(DNS\) ?](#)

For more information on DNS see wikipedia as it has detailed descriptions.
